EDUCATION

Bachelor of Engineering, Computer Engineering, York University

Sep 2019 – Expected Apr 2026

SKILLS

Languages: Python, Go (Golang), TypeScript, JavaScript, Svelte, C, C#, C++, Java, HTML, CSS, SQL, GraphQL

Tools & Frameworks: React.js, Next.js, Node.js, Azure, Docker, Selenium, Jenkins, Jira, Confluence, Git

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Pelmorex

Sep 2024 – Apr 2025

- Developed an interactive map visualization layer that displays real-time geometric data for active weather alerts, eliminating manual data queries and drastically reducing alert processing time. *Using Go, TypeScript, Protobuf*
- Optimized the alert prioritization system for weather updates, ensuring quicker future updates and timely delivery of critical notifications to users across Canada and the USA. *Using Go*

Software Engineer, Nobl Kids

Sep 2024 – Dec 2024

- Engineered responsive landing pages for B2B and B2C audiences, enhancing brand visibility through modern animations and intuitive user interfaces *Using React, Framer Motion*

Founding Engineer, Rout3

May 2024 – Aug 2024

- Led the development of a dashboard web app that abstracted LLM usage complexity, achieving a **76 times** reduction in operational costs while ensuring an intuitive user interface. *Using Svelte, TypeScript, Python, FastAPI*
- Designed and developed a high-performance landing page for LLM Proxy, improving user engagement and SEO through optimized loading and responsive UI. *Using Astro, TypeScript, Tailwind CSS*
- Secured **\$10,000** in funding from YorkU's BB2S incubator to accelerate development and enhance project capabilities, demonstrating strong product potential.

Frontend Engineer Intern, goeasy

Feb 2023 – Sep 2023

- Spearheaded the UI refinement for a banking web application, enhancing readability and user experience for **50,000+** active users while maintaining brand and accessibility standards. *Using Next.js, Contentful, Apollo.*
- Developed **20+** integration tests for Apollo Server, achieving a **96%** success rate in identifying data inconsistencies across various account types, boosting system reliability. *Using Jest, supertest, Apollo GraphQL.*
- Designed and developed a user-friendly 404 error page, incorporating intuitive navigation and brand-consistent styling, which reduced bounce rates by **25%** and enhanced user satisfaction.

Business Analyst Intern, goeasy

Jan 2023 – Feb 2023

- Created Jira tickets and comprehensive customer journey workflow documentation in Confluence, improving service efficiency through Agile methodologies and ensuring alignment with business requirements.

Cloud Engineer Intern, Ontario Ministry of Health

Sep 2021 – Sep 2022

- Developed an in-house Power Apps workflow, eliminating the need for third-party services, resulting in savings of **\$6,000+ annually** and bolstering data security and privacy. *Using REST API, Data Factory, Blob Storage.*
- Streamlined Excel report management by developing an Azure automation pipeline removing **40+** hours of monthly manual work and increasing efficiency by **25%**. *Using Logic Apps, SQL databases, Power BI, SharePoint.*
- Boosted operational efficiency by developing a Power Apps workflow for a high-traffic website, enabling seamless toggling of maintenance mode on or off, reducing downtime by **90%**

PROJECTS

Large Language Model Proxy 🔗

- Project managed and developed an open-source LLM proxy, enabling streamlined implementation of security, routing, and monitoring features across multiple Large Language Models. *Using Python, Hugging Face*
- Received the BEST Lassonde Technology Impact Award

Warehouse Management System

- Led the development of a Warehouse Management System, emphasizing software design principles and SQL integration to enhance inventory and logistics management. *Using Java, SQL*
