EDUCATION

Bachelor of Engineering, Computer Engineering, York University

Sep 2019 – Expected Apr 2026

SKILLS

Languages: Python, Go (Golang), TypeScript, JavaScript, Svelte, C, C#, C++, Java, HTML, CSS, SQL, GraphQL

Tools & Frameworks: React.js, Next.js, Node.js, Azure, Docker, Selenium, Jenkins, Jira, Confluence, Git

PROFESSIONAL EXPERIENCE

Software Engineer Intern, Pelmorex

Sep 2024 – Apr 2025

- Developed an interactive map visualization layer that displays real-time geometric data for active weather alerts, eliminating manual data queries and drastically reducing alert processing time. *Using Go, TypeScript, Protobuf*
- Pioneered a system that generates targeted questions for weather alerts, providing users quick access to critical information while reducing LLM costs by **85%** through efficient caching. *Using Go, Langfuse*
- Optimized the alert prioritization system for weather updates, ensuring quicker future updates and timely delivery of critical notifications to **10M+** users across Canada and the USA. *Using Go*

Software Engineer, Nobl Kids

Sep 2024 – Dec 2024

- Engineered responsive landing pages for B2B and B2C audiences, enhancing brand visibility through modern animations and intuitive user interfaces *Using React, Framer Motion*
- Restructured the multi-step editing system into a single page with progressive saving functionality, eliminating data loss risks and reducing user friction through efficient state management. *Using React, TypeScript*

Founding Engineer, Rout3

May 2024 – Aug 2024

- Led the development of a web app that abstracted LLM usage complexity, achieving a **76** times reduction in operational costs while ensuring an intuitive user interface. *Using Svelte, TypeScript, Python, FastAPI*
- Designed and developed a high-performance landing page for LLM Proxy, improving user engagement and SEO through optimized loading and responsive UI. *Using Astro, TypeScript, Tailwind CSS*
- Secured **\$10,000** in funding from YorkU's BB2S incubator to accelerate development and enhance project capabilities, demonstrating strong product potential.

Frontend Engineer Intern, goeasy

Jan 2023 – Sep 2023

- Spearheaded the UI refinement for a banking web application, enhancing readability and user experience for **50,000+** active users while maintaining brand and accessibility standards. *Using Next.js, Contentful, Apollo*
- Developed **20+** integration tests for Apollo Server, achieving a **96%** success rate in identifying data inconsistencies across various account types, boosting system reliability. *Using Jest, supertest, Apollo GraphQL*

Cloud Engineer Intern, Ontario Ministry of Health

Sep 2021 – Sep 2022

- Developed an in-house Power Apps workflow, eliminating the need for third-party services, resulting in savings of **\$6,000+ annually** and bolstering data security and privacy. *Using REST API, Data Factory, Blob Storage*
- Streamlined Excel report management by developing an Azure automation pipeline removing **40+** hours of monthly manual work and increasing efficiency by **25%**. *Using Logic Apps, SQL databases, Power BI, SharePoint*

PROJECTS

Large Language Model Proxy 🌐

- Project managed and developed an open-source LLM proxy, enabling streamlined implementation of security, routing, and monitoring features across multiple Large Language Models. *Using Python, Hugging Face*
- Received the BEST Lassonde Technology Impact Award
