EDUCATION

Bachelor of Engineering, Computer Engineering
York University

Expected Apr 2026
Toronto, ON

EXPERIENCE

Software Engineer Intern
League

Sept 2025 – Dec 2025
Toronto, ON

- Developed a cohort targeted tile to access an external service using an internal framework, extending backend endpoints to forward user specific URLs while implementing iOS webview functionality. (Swift, Go, YAML)

Software Engineer Intern
The Weather Network (Pelmorex)

Sept 2024 – Apr 2025
Oakville, ON

- Engineered a real-time interactive map layer to visualize weather alert geometry, boosting developer velocity by eliminating manual queries and ensuring scalability for a **10M+** user base. (React, TypeScript, Protobuf)
- Pioneered a system that generates targeted questions for weather alerts, providing users quick access to critical information while reducing LLM costs by **85%** through efficient caching. (Go, Langfuse)
- Developed a data processing service to translate weather metrics into a proprietary respiratory risk score, powering a new API product for marketing campaigns valued at **\$140K**. (Go, JSON)

Software Engineer
Nobl Kids

Sept 2024 – Dec 2024
Toronto, ON

- Translated UI/UX designs into responsive B2B and B2C landing pages from scratch, improving the Google Lighthouse performance score by **100%** through modern, optimized code. (React, Tailwind CSS, Framer Motion)
- Restructured the multi-step editing system into a single page with progressive saving functionality, eliminating data loss risks and reducing user friction through efficient state management. (React, TypeScript)

Founding Engineer
Rout3

May 2024 – Aug 2024
Toronto, ON

- Led the development of a web app that abstracted the complexity of using multiple LLMs, achieving up to a **76x** reduction in operational costs. (Svelte, TypeScript, Python, FastAPI)
- Designed and developed a high-performance landing page for LLM Proxy, leveraging static site generation to ensure near-instant loading times and maximize SEO performance. (Astro, TypeScript, Tailwind CSS)
- Secured **\$10,000** in funding from YorkU's BB2S incubator to accelerate development and enhance project capabilities, demonstrating strong product potential.

Frontend Engineer Intern
goeasy

Jan 2023 – Sep 2023
Mississauga, ON

- Owned a platform-wide UI enhancement initiative, collaborating with stakeholders to identify and implement changes that improved visual consistency and accessibility for **50,000+** users. (Next.js, Contentful, Apollo)
- Developed **20+** integration tests for Apollo Server, achieving a **96%** success rate in identifying data inconsistencies across various account types, boosting system reliability. (Jest, Supertest, GraphQL)

Cloud Engineer Intern
Ontario Ministry of Health

Sept 2021 – Sept 2022
Toronto, ON

- Developed an in-house Power Apps workflow, eliminating the need for third-party services, resulting in savings of **\$6,000+ annually** and bolstering data security and privacy. (REST API, Data Factory, Blob Storage)
- Streamlined Excel report management by developing an Azure automation pipeline removing **40+** hours of monthly manual work and increasing efficiency by **25%**. (Logic Apps, SQL databases, Power BI, SharePoint)

SKILLS

Languages: Python, Go (Golang), TypeScript, JavaScript, Swift, C, C#, C++, Java, HTML, CSS, SQL, GraphQL

Tools & Frameworks: React.js, Next.js, Node.js, Azure, Docker, Svelte, Selenium, Jenkins, Jira, Confluence, Git
