🎓 EDUCATION

Bachelor of Engineering, Computer Engineering, York University

Sep 2019 – Apr 2025

🧠 SKILLS

Programming Languages: Python, Java, TypeScript, JavaScript, HTML, CSS, C, C#, C++, SQL, BASH

Tools/Technologies: React.js, Next.js, Node.js, Git, Microsoft Azure, Google Tag Manager, Docker, GraphQL, Selenium

📁 PROFESSIONAL EXPERIENCE

Lead Full Stack Developer & Co-Founder, Rout3

May 2024 – Aug 2024

- Led the development of the LLM Proxy Dashboard, ensuring an intuitive user interface and optimal performance. *Using Svelte, FastAPI, Vue*
- Designed and developed the landing page for the LLM Proxy. *Using Astro, Tailwind CSS, React, TypeScript*

Front End Developer Intern, goeasy

Feb 2023 – Sep 2023

- Spearheaded the UI refinement for a banking web application, enhancing readability and user experience for **10,000+** active users while maintaining brand and accessibility standards. *Using Next.js, Contentful, Apollo.*
- Developed **20+** integration tests for Apollo Server, achieving a **96%** success rate in identifying data inconsistencies across various account types, boosting system reliability. *Using Jest, supertest, Apollo GraphQL.*
- Designed and developed a user-friendly 404 error page, incorporating intuitive navigation and brand-consistent styling, which reduced bounce rates by **25%** and enhanced user satisfaction.

Business Analyst Intern, goeasy

Jan 2023 – Feb 2023

- Crafted and implemented customer journey workflow documentation, enhancing understanding of customer behavior and improving service efficiency.
- Actively participated in strategic meetings with stakeholders, employing Agile methodologies to align product vision with goeasy's mission and overarching business objectives, ensuring user requirements were met.

Application Developer Co-op, Ontario Ministry of Health

Sep 2021 – Sep 2022

- Developed an in-house Power Apps workflow, eliminating the need for third-party services, resulting in savings of **\$6,000+ annually** and bolstering data security and privacy. *Using REST API, Data Factory, Blob Storage.*
- Streamlined Excel report management by developing an Azure automation pipeline removing **40+** hours of monthly manual work and increasing efficiency by **25%**. *Using Logic Apps, SQL databases, Power BI, SharePoint.*
- Addressed and resolved **300+** client support inquiries, liaising via email and virtual meetings, and further generated **100+** tickets for the Azure ITS team.
- Boosted operational efficiency by developing a Power Apps workflow for a high-traffic website, enabling seamless toggling of maintenance mode on or off, reducing downtime by **90%**

📁 PROJECTS

Large Language Model Proxy 🔗

- Project managed and developed an open-source LLM proxy, enabling streamlined implementation of security, routing, and monitoring features across multiple Large Language Models. *Using Python, Hugging Face*
- BEST Lassonde Technology Impact Award

Warehouse Management System

- Led the development of a Warehouse Management System, emphasizing sophisticated software design and SQL integration to enhance inventory and logistics management. *Using Java, SQL*

IT Response Automation System 🔗

- Automated IT ticket responses using OpenAI API, integrating email and Microsoft Teams for streamlined ticket processing and team notifications within York's Halo system. *Using Python*

Interactive MIDI LED Piano Tutor

- Developed a system that interprets MIDI files to manage LED strip lighting, signaling the immediate notes to play while subtly previewing subsequent ones. *Using C++ and Arduino*
