EDUCATION

Bachelor of Engineering, Computer Engineering
York University

Apr 2026
Toronto, ON

SKILLS

Languages: Python, Go (Golang), TypeScript, JavaScript, Swift, Kotlin, C, C#, C++, Java, HTML, CSS, SQL, GraphQL

Tools & Frameworks: React.js, Next.js, Node.js, Azure, Docker, Svelte, Selenium, Jenkins, Jira, Confluence, Git

EXPERIENCE

Software Engineer (Part-time)

Jan 2026 – Apr 2026

League

Toronto, ON

- Bootstrapping the architecture for a new tenant application by adapting existing core modules and refactoring an internal SDK to expose public upload workflows. *(Swift, Kotlin, Go)*

Software Engineer Intern

Sep 2025 – Dec 2025

League

Toronto, ON

- Delivered the full-stack implementation of a configurable settings feature for the tenant app, managing routing logic via Contentful to ensure consistent behavior on both mobile platforms. *(Swift, Kotlin, Go, Contentful)*
- Developed a UI component using an internal framework, visible only to configured user groups, integrating an external service via an iOS WebView. *(Swift, Go, YAML, Google Cloud Platform)*

Software Engineer Intern

Sep 2024 – Apr 2025

The Weather Network (Pelmorex)

Oakville, ON

- Engineered a real-time interactive map layer to visualize weather alert geometry, boosting developer velocity by eliminating manual queries and ensuring scalability for a **10M+** user base. *(React, TypeScript, Protobuf)*
- Pioneered a system that generates targeted questions for weather alerts, providing users quick access to critical information while reducing LLM costs by **85%** through efficient caching. *(Go, Langfuse)*
- Developed a data processing service to translate weather metrics into a proprietary respiratory risk score, powering a new API product for marketing campaigns valued at **\$140K**. *(Go, JSON)*

Software Engineer

Sep 2024 – Dec 2024

Nobl Kids

Toronto, ON

- Translated UI/UX designs into responsive B2B and B2C landing pages from scratch, improving the Google Lighthouse performance score by **100%** through modern, optimized code. *(React, Tailwind CSS, Framer Motion)*
- Restructured the multi-step editing system into a single page with progressive saving functionality, eliminating data loss risks and reducing user friction through efficient state management. *(React, TypeScript)*

Founding Engineer

May 2024 – Aug 2024

Rout3

Toronto, ON

- Led the development of a web app that abstracted the complexity of using multiple LLMs, achieving up to a **76x** reduction in operational costs. *(React, Svelte, TypeScript, Python, FastAPI)*
- Designed and developed a high-performance landing page for LLM Proxy, leveraging static site generation to ensure near-instant loading times and maximize SEO performance. *(Astro, TypeScript, Tailwind CSS)*
- Secured **\$10,000** in funding from YorkU to accelerate development and enhance project capabilities.

Frontend Engineer Intern

Jan 2023 – Sep 2023

goeasy

Mississauga, ON

- Owned a platform-wide UI enhancement initiative, collaborating with stakeholders to identify and implement changes that improved visual consistency and accessibility for **50,000+** users. *(React, Next.js, Contentful, Apollo)*
- Developed **20+** integration tests for Apollo Server, achieving a **96%** success rate in identifying data inconsistencies across various account types, boosting system reliability. *(Jest, Supertest, GraphQL)*

Cloud Engineer Intern

Sep 2021 – Aug 2022

Ontario Ministry of Health

Toronto, ON

- Developed an in-house Power Apps workflow, eliminating the need for third-party services, resulting in savings of **\$6,000+ annually** and bolstering data security and privacy. *(REST API, Data Factory, Blob Storage)*
- Streamlined Excel report management by developing an Azure automation pipeline removing **40+** hours of monthly manual work and increasing efficiency by **25%**. *(Logic Apps, SQL databases, Power BI, SharePoint)*
